Review: ‘The Incubus of Intervention: Conflicting Indonesia Strategies of John F. Kennedy and Allen Dulles’

Greg Poulgrain *The Incubus of Intervention: Conflicting Indonesia Strategies of John F. Kennedy and Allen Dulles* (Strategic Information and Research Development Centre, Selangor, Malaysia)

By Jim Miles, May 15, 2015

The *Incubus of Intervention* stands alone as a well-written, clearly detailed and intriguing reassessment of historical events in and around Indonesia.

As an alternate to the history of the Cold War in relation to its developments and impact on Indonesia – and even further abroad – *The Incubus of Intervention* is an intriguing and complex review of the historical record.

The title word ‘incubus’ indicates a nightmare, evil spirit, or a person or thing that oppresses like a nightmare. As many other studies have shown, it is an appropriate appellation for the interventions of colonial powers and those trying to usurp the colonial powers. In this case, the colonial power is the Netherlands and the usurper, as in most cases post World War II, the U.S.

Most mainstream histories report the Indonesian story as a conflict between a central power structure becoming dominated by communists, and a rebellion attempting to overthrow the central government for more regional autonomy. The deceit and webs of intrigue in the background present a different picture.

Allen Dulles plays the dominant role. As head of the CIA from its inception, and with a history of espionage, under cover maneuverings, and many ties to legal and corporate interests, Dulles became the ‘embodiment’ of U.S. foreign policy in Indonesia.[1]

While considered a failure in standard histories, Poulgrain shows how the rebellion itself was manipulated by Dulles in order to have it fail. The ultimate prize of course was keeping Indonesia away from the clutches of the Soviet communists. The back story is much more convoluted and intriguing than that simplified scenario.

The story also involves oil and gold (naturally, as with most U.S. interventions looking for corporate control of resources), the royalty of the Netherlands and Germany, the oil companies and mineral explorers of the Netherlands and the U.S., Wilsonian ideals of self-determination, especially for the indigenous people of Papua New Guinea, regime change, and last but not least, Dag Hammarskjold and John F. Kennedy.

There are many people who would have wanted Kennedy killed – crime syndicates, political opponents, Cuban expatriates, Russians (least likely scenario), and as per Poulgrain, Allen Dulles is

a strong contender for that list.[2] Kennedy's relationship with Sukarno and his attempts to find a peaceable course of action to keep Indonesia within the U.S. sphere jeopardized the corporate background interests of Allen Dulles.

Dag Hammarskjold also became a problem as he worked with the ideals of the non-aligned movement. His efforts in Indonesia are not as well known as his efforts in the former Belgian Congo, but both conflicted with Dulles' attempts at grabbing resource rich former colonies for U.S. corporate control. As should be generally known, Hammarskjold was killed in a plane crash in 1961 in the Congo, very likely from Dulles' CIA and corporate connections aiming for control of the riches of the Congo, nine months after the CIA killed the Congo's Patrice Lumumba, another patron of the post-colonial non-aligned movement.

Poulgrain's analysis begins with the discovery of an enormous source of copper and gold in Western New Guinea (now West Papua and Papua provinces of Indonesia), continues through the Japanese push for resources in South Asia, and on into the establishment of an independent Indonesia and its internal and external conflicts.

A general historical background will help with the understanding of all the different characters and interactions and intrigues. *The Incubus of Intervention* stands alone as a well written, clearly detailed and intriguing reassessment of historical events in and around Indonesia.
